

IGWE KELECHI DANIEL

Civil Engineer | Sustainable Environmental Management Enthusiast

Owerri, Imo State, Nigeria | igwedaniel68@gmail.com | +234 913 541 2920

PROFESSIONAL SUMMARY

Driven Civil Engineer with comprehensive experience in infrastructure design, site supervision, and energy/engineering project operations. Proven commitment to climate-resilient engineering, demonstrated through research in waste-to-resource materials (plastic-modified asphalt), community flood response, and sustainable project execution. Strong leadership, stakeholder coordination, and technical problem-solving skills, eager to leverage expertise in Sustainable Environmental Management.

SKILLS

Environmental & Sustainability: Environmental Impact Assessment (EIA), Life Cycle Assessment (LCA), Waste Reduction & Recycling Integration, Climate-Resilient Infrastructure

Technical & Engineering: AutoCAD, Road Surveying, Site Supervision, Bills of Engineering Measurement and Evaluation (BEME), Document Control, Microsoft Excel

Core Competencies: Engineering Operations, Project Management Support, Electronic Field Drawing Management, Cost & Schedule Impact Mitigation, Quality Control

Languages: English (Native), Georgian (Basic)

WORK EXPERIENCE

Assistant Project Engineer

Sep 2022 – Feb 2026

Prime Energy — Tbilisi, Georgia

- Maintained project documents and technical specifications for all active projects, ensuring the most up-to-date set was continuously accessible to engineering teams.
- Managed and maintained electronic field drawings while providing accurate, real-time project details to site personnel and stakeholders.
- Oversaw document control workflows and ensured rapid, timely responses to potential cost and schedule impacts.
- Assisted senior project managers in coordinating civil and energy project workflows, site execution schedules, and resource allocation.
- Monitored on-site engineering activities to verify compliance with quality standards, environmental safety protocols, and design specifications.

Site Engineer

Aug 2019 – Mar 2022

Kingslight Engineering Services — Port Harcourt, Nigeria

- Designed and supervised the construction of 10+ residential buildings (duplexes and bungalows) across Imo, Ebonyi, and Rivers States from foundation through to final finishing.
- Managed end-to-end procurement of construction materials, maintaining budget efficiency and quality compliance.
- Oversaw daily labor allocation, contractor scheduling, site safety protocols, and payroll operations for multidisciplinary site teams.

Technical Assistant (Trainee)

Dec 2017 – Jun 2019

Federal Road Maintenance Agency (FERMA) — Owerri, Nigeria

- Conducted site surveys, damage assessments, and engineering measurements for 100+ federal roads across Imo State.
- Independently supervised the physical rehabilitation and quality control of the Owerri–Orlu Highway.
- Assisted senior engineers in calculating Bills of Engineering Measurement and Evaluation (BEME) for infrastructural maintenance contracts.

RESEARCH & SUSTAINABILITY PROJECTS

Plastic Waste-Modified Asphalt Study (Undergraduate Thesis): Investigated the utilization of recycled plastic waste as a substitute material in asphalt production to mitigate land/marine pollution and improve pavement durability.

Guest Lecture Series: Authored and delivered a departmental lecture on "Climate-Resilient Infrastructure: Merging Indigenous Building Science with Modern Civil Engineering."

EDUCATION

B.Eng. in Civil Engineering	2019
<i>Michael Okpara University of Agriculture, Umudike</i>	
Senior Secondary School Certificate (SSCE)	2013
<i>Stan Best Secondary School, Cross River State</i>	

PROFESSIONAL MEMBERSHIPS & VOLUNTEERING

- Member: Nigerian Society of Engineers (NSE)
- Beach Plastic Cleanup Volunteer — Batumi, Georgia (2023)
- Flood Relief Volunteer — Delta State, Nigeria (2016)
